Projects

Financial Astrology Global – Trading Strategy Learning Platform

[Live](#) | [GitHub](#)

- Developed a trading education platform where admins can create courses, add lectures, assign courses to users, and manage community engagement.
- Integrated a community page for real-time discussion and queries related to financial astrology and trading strategies.
- Used **FastAPI** for high-performance backend, **PostgreSQL** for database, and deployed backend on **Render**, frontend on **Vercel**.
- Ensured secure course access and smooth user management with role-based authorization.

Tractor 360 – Tractor Discovery and Comparison Platform

[Live](#) | [GitHub](#)

- Created a web platform for browsing, comparing, and inquiring about tractors from various brands and models.
- Built features for admin to connect with interested buyers, generate leads, and earn commissions on successful purchases.
- Utilized **FastAPI** and **MySQL** for efficient data handling, and deployed backend on **Render**, frontend on **Vercel**.
- Implemented responsive UI with advanced tractor filters, vendor profiles, and comparison tools.

Certifications

[AWS Cloud Engineer](#)

[AWS Cloud Foundation](#)

[Google Cloud Foundation](#)

[MongoDB foundation](#)
